

A kiépítés csak akkor szükséges, ha az IC-t a foglalatba helyezzük és ICSP-n keresztül programozzuk!
 Microstick II. esetén az RST, R5, C8, C7, C1 szükségtelen! - RX/TX fel van cserélve az eredetihez képest! - PIC32MX1/2-es kontrollerek támogatásához!
 Microstick I. esetén C1 már át van vezetve!

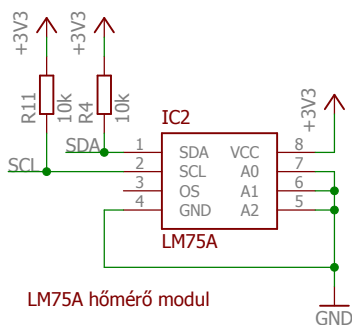

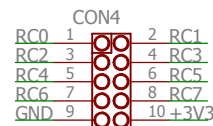

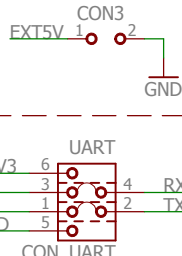

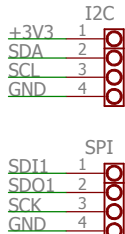

Nyomógombok/analog eszközök modul

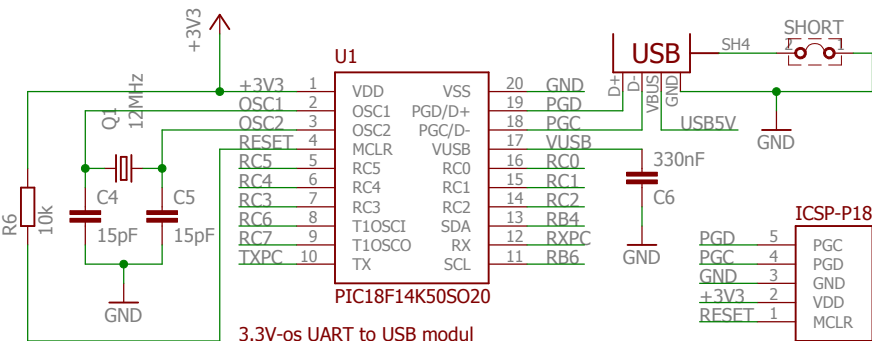

LCD modul
4 bites késleltetéses üzemmód

EEPROM modul

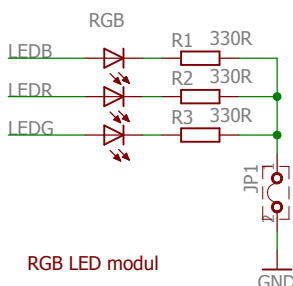

LM75A hőmérő modul

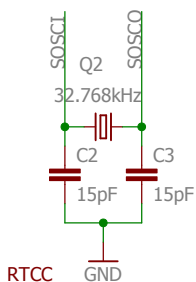

3.3V-os UART to USB modul

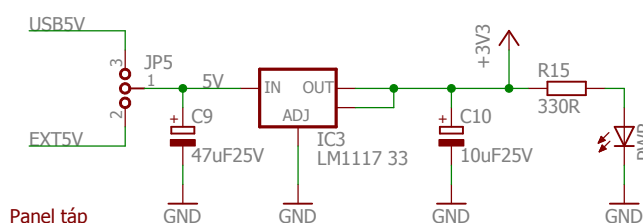

CON1

RGB LED modul

RTCC

Panel táp
